RED RADIANCE ➔

Dear Glad Friend:

Once again it is Catalog time and we are happy to send you our 1956 edition.

We sincerely thank all of our customers for their business during the past years and hope that we will have the pleasure of serving you in 1956. If you have never ordered from us, may we suggest a trial order. We feel sure that you will be well satisfied with the quality of our bulbs. Ideal fall weather made easier the task of harvesting our crop of clean, healthy bulbs.

We have received many favorable reports on the performance of our introductions, which are fully described in the next pages of our catalog.

1956 is the year for the release of the All American Selections. You will find them described on the back cover.

KEY TO VARIETY LIST

Size and color are indicated by the code number. The first figure indicates a size group, while the last two digits give the color class. Name of originator follows the variety name. Next follows the year the variety was first available to American purchasers, and after that, for many of the varieties will be found in parenthesis the number of growing days required from planting to date of blooming. The number of days to bloom is usually figured for large bulbs; medium size bulbs usually require from 5 to 7 days longer to bloom. Because of variations in climate, the number of days required for a particular variety to bloom may vary by several days. However, the listed blooming dates will give a fair approximation of what to expect of a variety.

BUSINESS TERMS

Prices are for Cash with Order or 25% Deposit to hold an order, balance before shipment or C. O. D.

All quotations are subject to prior sale.

Orders are filled with clean healthy stock, true to name and up to size. However, if error should occur, we will endeavor to make satisfactory adjustment either by replacement of stock or refund of the purchase price.

Shipment can be made either by Parcel Post or Express. If your order consists of both prepaid and F. O. B. items we will ship the entire order Express Collect and add extra bulbs to offset the shipping charges on the prepaid items.

Substitution: We do not substitute variety without permission. If out of size ordered we will substitute with next size larger or smaller to the amount of money sent. If you do not want us to substitute size, please advise.

PAUL BUNYAN (540)

1955 Introduction

A huge salmon pink with deep rose throat markings. The heavily ruffled and fluted florets are of very heavy texture, with good placement and firm attachment.

Opens 8 to 10 very large blooms often attaining 7" in diameter. It has a very long flowerhead of 22 or more buds most of which are in color.

Paul Bunyan grows to a height of 60". The plant is very vigorous with deep green foliage and makes healthy bulbs. Bulblet production and germination are both good. Blooms in 85 days.

Paul Bunyan will be a real contender on the show table. Picture a spike with 8 to 10 perfectly placed 7" florets open and 10 or more buds in color on a long flowerhead, and you have not only a first place winner in its class, but also an excellent chance to win Grand Champion, Largest Spike in the Show, Largest Floret, Longest Flowerhead, etc.

Paul Bunyan won Grand Champion award at the Eastern New York Show. It was also rated among the top ten 1955 introductions in the N. A. G. C. Symposium.

Commercial growers who have need for a very large pink cut flower will find Paul Bunyan a profitable glad to grow as its growing habits, color and opening qualities are up to commercial standards.

CELESTIAL ROSE (540)

1954 Introduction

GLISTENING clear light rose pink blending to a white throat. A very beautiful color.

Opens 8 5" blooms with 6 buds in color on a 21 bud spike. Florets are beautifully formed and nicely ruffled. Attachment is very good and the formal placement is all that could be desired.

Flowerhead 27", height 58".

Blooms in 85 days.

This variety makes high crowned and healthy bulbs. Propagation and germination are both good. Celestial Rose is an easy grower that consistently produces good spikes. Neither the floret nor the calyx is subject to burn even in extremely hot weather. Should be tops as a commercial cut flower and a fine show glad as well.

MOTHER ANNE (466)

1954 Introduction

MEDIUM rose - lavender blending to a small cream throat. The $4\frac{3}{4}$ " florets are rather deep and nicely ruffled. Informal placement. Opens 7 to 8 on a well balanced spike of 21 buds. Six additional buds in color. Flowerhead 28", height 56", blooms in about 75 days.

Mother Anne has a distinctive color that holds up well as florets open up the spike. Attachment, placement and spacing are all that could be desired.

This variety has the qualities to make a successful commercial cut flower. Makes healthy plants and bulbs and is a good propagator.

FORTUNE (422)

1954 Introduction

BRIGHT clear golden orange without blotch or markings. Color about midway between Orange Gold and Patrol. The 4½" florets have slightly rolled back petals, giving it a needle point effect. Opens 6 to 7 with 6 additional buds in color on a well balanced spike of 19 buds. Attachment is good and florets and buds are nicely spaced on a stretchy flowerhead of 26". Field height 58".

Blooms in approximately 80 days. Fortune should prove to be a valuable addition to the orange class because of its bright glowing color and dependable growing habits. Makes well proportioned spikes even from small bulbs.

Produce clean, healthy bulbs and bulblet production and germination are excellent. These qualities together with the ability to withstand heat make Fortune the leading commercial orange.

MARGERY (462)

1953 Introduction

MARGERY—A very early large flowered variety (blooms in 70 days), is a brilliant cerise rose with a deeper rose throat. Many of our customers and visitors call it an American beauty rose.

Its color has a sparkle and luster that must be seen to be appreciated. Margery easily opens 8 or more slightly ruffled 5" florets, with very good placement and firm attachment and most of the remaining buds showing color.

Under ordinary field culture the spikes will average 21 buds with a 26" flowerhead and a field height of 58". Foliage is deep green and of medium height making the tall spikes easy to cut. Margery produces high crowned and healthy bulbs. Bulblets are of average size and germinate easily. Propagation is good.

For the past several years Margery was the first large flowered variety to bloom. Because of its earliness, very fine color and dependability Margery will be a profitable variety for the commercial grower.

RED RADIANCE (450)

1953 Introduction

RED RADIANCE is a very bright and clear light red without markings of any kind, a shade of red that the florist can use in quantity. Opens 8 to 10 5½" florets of heavy substance and perfect placement on tall sturdy spikes of 20 or more buds, 6 buds in color. Spacing and attachment are ideal and spikes are of good proportion. It makes fine bulbs and plenty of bulblets that germinate easily.

Red Radiance makes tall, straight spikes which consistently grow up to 5 feet. The plants are wide leaved and of medium height, making it possible to cut long stems and save most of the plant for bulb growth.

The plants of Red Radiance are very wide at the base and the spikes stand up well in rain and wind when many others go down, this being of great importance to commercial growers.

All through one of the hottest summers on record, Red Radiance continued to produce top notch commercial spikes just as it has during cooler years. Its brilliant red color remained unchanged despite the intense 100 degree heat.

Reports from all over the United States and Canada confirm our own experience that Red Radiance is the best red commercial glad. If you are a cut flower grower you cannot afford to be without Red Radiance.

New for 1956

DARK BRILLIANCE (454)

From COSMOPOLITAN GARDENS, Milwaukee, Wis. (Introducer's Description)

DARK BRILLIANCE (454) (Puerer) Dark Brilliance is a King David mutation, darker in color rather than lighter, as is the case of most sports. The color is a very deep wine red with velvety, glossy florets which retain the silver picotee edging of King David. The florets are slightly more plain petaled but open more flatly against the stem. Spikes carry 20 to 22 buds, opening 8 with 6 in color. Bulblet propagation and germination are excellent and produce fine, clean, high crowned bulbs. Arranged with pastel shades, Dark Brilliance has color appeal beyond comparison. We have few outstanding dark colored varieties and Dark Brilliance will prove valuable for this reason.

Priced: L \$3.00 M \$2.50 S \$2.00 Bulblets .30 each; 10 for \$2.50

One large bulb and 10 bulblets for \$4.50.

Per 10	4.80	3.20	2.00	100— 2.75

Wholesale Prices

(NOT PREPAID — NO DISCOUNT)

Shipment by Express is usually safest as the bulbs are insured against freezing. However on small orders it is cheaper and in some cases more convenient to the purchaser to ship by Parcel Post. Please send approximate amount of postage to cover if wanted by mail. Will add additional bulbs for any excess postage.

25 bulbs sold at the 100 rate; 250 at 1000 rate.

Bulbs graded by diameter in six sizes as follows:

No. 1	No. 2	No. 3	No. 4	No. 5	No. 6
1½"-up	1¼"-1½"	1"-1¼"	¾"-1"	½"-¾"	⅜"-½"

ACE OF SPADES (554) Sisson '50 (85) Very deep maroon red with a glistening sheen. 5" ruffled florets, wide open with good placement and attachment. 6 open on a 20 bud spike. Good propagator and germinator. A dark glad with a lot of class.

	No. 1	No. 2	No. 3	No. 4	No. 5	No. 6	Blbts.

1956 All-American Gladiolus Releases

APPLEBLOSSOM (R) AAGS

Plant Patent No.: Patent Applied For

Year of Introduction: 1956

Co-Originators: Ralph Baerman, Carl Fischer

Parentage: Beauty's Blush x Rose Charm

Blooming Date: Early Midseason

North American Gladiolus Council Show Classification: 460

Description: A gladiolus of the utmost delicacy of coloring, the predominating hue being snowy white with a faint touch of cream in the throat and an exquisite flush or corona of cool rose pink at the edges of the petals. Up to eight or ten trimly tailored florets, about five inches in diameter and of very heavy substance, are open at a time on spikes up to five feet tall. A vigorous, easy grower that performs excellently with only average culture. Appleblossom will give you a new conception of gladiolus beauty when it blooms in your garden.

ROYAL STEWART (R) AAGS

Plant Patent No.: 1339

Year of Introduction: 1956

Originator: Ralph Pommert

Parentage: Red Charm x Unnamed Seedling

Blooming Date: Early Midseason

North American Gladiolus Council Show Classification: 450

Description: A truly remarkable new gladiolus variety that has been widely acclaimed for its consistently fine performances under an extensive test program throughout the United States and Canada. The lightly ruffled florets are five inches in diameter and are of good substance. They are a clear light red and the long flowerheads frequently carry up to twelve florets open at one time. Growth is vigorous and healthy, with the total height of the plants running about five feet. On the occasions when it has been exhibited at gladiolus shows, Royal Stewart has proved to be a big winner of top awards.

RETAIL PRICE: (both varieties) Large bulbs only—No. 1 size to the extent possible—will be sold.

\$1.00 each \$2.50 for 3 \$4.75 for 6 (3 Appleblossom and 3 Royal Stewart or 6 of either)

The right to reproduce the All-American varieties for resale purposes or to sell cut-flowers is reserved.
